10 reasons your website does not sell

1. Unclear offer. A visitor should get it within 5 seconds.
2. The site loads for over three seconds. Half of visitors leave before it opens.
3. Hard to use on a phone, where most visitors come from.
4. No single main action. People do not know where to click.
5. No proof: reviews, cases, numbers, client logos.
6. The text is about you, not about the client’s benefit.
7. A long or awkward request form.
8. No analytics. You cannot see where people leave.
9. Ads lead to the wrong page.
10. No answers to objections: price, timing, guarantees.
